SHOT SCRIPT · SCREEN RECORDING + VOICEOVER

One guest, one system

A 75-second film that follows one guest through the hotel and shows that every desk is connected: front desk, restaurant, kitchen, stores, housekeeping and the accounts. A longer walkthrough for interested owners follows at the end.

Length 1:15 (short) · 5–6 min (walkthrough) **Format** 1920 × 1080, 30 fps **Site** www.agmsync.com

Hotel the demo hotel created for the video

Before you record

The morning of the shoot

1. Sign in to the demo hotel with the login you were given.
2. **System Settings** → **Sample Data**. If it says data is loaded, press **Remove** first, then **Load**. This dates everything from today: guests arriving today, checkouts yesterday.
3. Open the **Main Dashboard** and check it shows guests in the house and arrivals today.
4. Need to redo a scene later? Remove and Load again. Everything goes back to the start.

Screen and recorder

1. Chrome on a laptop or desktop, browser zoom **110%**, full screen with **F11**.
2. Light theme. Close other tabs and turn off notifications.
3. Record with OBS Studio (free) at 1080p 30 fps, or the Windows Xbox Game Bar (**Win + Alt + R**).
4. Move the mouse slowly. Pause one second before each click so the viewer can follow.
5. Record each scene as its own clip. A wrong click means a new take, not an edit.

Please don't

- Run **Night Audit**. It moves the hotel to tomorrow and the scenes stop matching.
- Change anything in **System Settings** apart from Sample Data.
- Show the sign-in page with a password typed in.

Who's who in the demo hotel

NAME	ROLE IN THE FILM	WHERE TO FIND THEM
Mariama Seidu	Our guest. Arrives today, Standard room, 2 nights, guaranteed.	Front Office → Desk → Arrivals today
Efua Nyarko	Leaving today. Paid a ₵400 cash deposit on arrival.	Front Office → Desk → Departures today
Star Beer (bottle)	24 bottles on the bar. One sale takes it to 23.	Inventory & Stores → Stock → Items
Yusif Abubakar	General Manager. Approvals wait for him.	Executive Management → Approvals

Amounts below assume the demo hotel's own room rates (Standard ₵350 a night, plus 21% tax). If rooms were set up differently, the totals will differ, and that's fine.

The short film

SC 01
0:00–0:07

The hotel at a glance

`Executive Management → Main Dashboard`

1. Start on the dashboard. Hold two seconds.
2. Scroll slowly past in-house guests, arrivals, occupancy and housekeeping status.

> VO
> Running a hotel means juggling the front desk, the kitchen, the stores, the books and the staff. AGM Sync puts all of it in one place.

One hotel. One system.

SC 02

0:07–0:17

Mariama checks in

`Front Office Operations → Desk`

1. Open **Arrivals today** and click **Mariama Seidu**.
2. Take payment: **Mobile Money**, one night (₵423.50).
3. Press **Check in**.
4. In the print choice, pick **Registration card** and print. Show the card for two seconds.

> VO
> Mariama arrives. Check-in takes seconds: her room, her mobile money payment and her registration card, all done.

Check-in in seconds

Check: her room turns **occupied**.

SC 03

0:17–0:27

Dinner, charged to the room

`Restaurant & Bar → POS Terminal`

1. Choose **In-house** and pick Mariama's room.
2. Add **Jollof Rice & Chicken** and **Star Beer (Bottle)**.
3. Press **Send to kitchen**, then **Bill to Room**.

> VO
> That evening she orders jollof and a cold Star. The waiter sends it to the kitchen and puts it on her room bill.

SC 04
0:27–0:35

The kitchen screen

`Kitchen → Kitchen Display`

1. Mariama's ticket is on the screen. Move it to **Ready**, then **Served**.

> VO
> The kitchen sees the order straight away. No paper, no shouting.

Tip: record SC 03 and SC 04 on two screens or two browser windows to show the ticket arriving live.

SC 05
0:35–0:42

Stock moves by itself

`Inventory & Stores → Stock → Items`

1. Search **Star Beer (bottle)**. Point the mouse at the Restaurant & Bar count.

> VO
> And the stores already know one bottle has gone.

Stock updates itself

Check: **23** bottles (it was 24).

SC 06
0:42–0:53

Efua checks out

`Front Office Operations → Desk → Departures today`

1. Click **Efua Nyarko** and open her bill. Hold on the tax lines for two seconds.
2. Take the balance by **Mobile Money**, then press **Check out**.

> VO
> At checkout, Efua's bill already carries VAT, NHIL, GETFund and the Tourism Levy, worked out the Ghana way.

Ghana taxes built in

Check: two nights ₵847.00, deposit ₵400.00, balance **₵447.00**.

SC 07
0:53–1:00

The room is turned around

`Housekeeping & Maintenance → Floor`

1. Efua's room shows **dirty**. Mark it cleaned, then inspected.

> VO
> Housekeeping sees the room is free and gets it ready for the next guest.

Check: the room shows **vacant and clean**.

SC 08
1:00–1:10

The owner's view

`Accounting & Finance → Statements → Income Statement`

1. Show the Income Statement for two seconds.
2. Press **F12** to open Ask Mamani and type: **How much did we make today?**
3. Let the answer appear. Trim the wait in the edit.

> VO
> And the owner? Every cedi is already in the accounts. Just ask.

Accounts, payroll and reports, always up to date

SC 09
1:10–1:15

End card

`Made in the editor (no screen recording)`

1. AGM Sync logo on the brand teal, with **agmsync.com** underneath.

> VO
> AGM Sync. For hotels, guest houses, restaurants and event centres. Book a demo at agmsync.com.

The whole voiceover

For the voice artist. About 150 words, read at a calm pace in roughly 70 seconds. Leave a short breath between scenes.

VOICEOVER TEXT

SC 01 Running a hotel means juggling the front desk, the kitchen, the stores, the books and the staff. AGM Sync puts all of it in one place.

SC 02 Mariama arrives. Check-in takes seconds: her room, her mobile money payment and her registration card, all done.

SC 03 That evening she orders jollof and a cold Star. The waiter sends it to the kitchen and puts it on her room bill.

SC 04 The kitchen sees the order straight away. No paper, no shouting.

SC 05 And the stores already know one bottle has gone.

SC 06 At checkout, Efua's bill already carries VAT, NHIL, GETFund and the Tourism Levy, worked out the Ghana way.

SC 07 Housekeeping sees the room is free and gets it ready for the next guest.

SC 08 And the owner? Every cedi is already in the accounts. Just ask.

SC 09 AGM Sync. For hotels, guest houses, restaurants and event centres. Book a demo at agmsync.com.

The walkthrough (5–6 minutes)

For owners who want to see more. One chapter per part of the hotel, in the order of the side menu. Record each as its own clip; the voice explains what the screen shows.

1. Executive Management `0:30`

- Main Dashboard: today's guests, occupancy, money in, alerts.
- Approvals: the wedding requisition REQ-0903 and a supplier payment waiting for the General Manager.

2. Front Office `0:50`

- Reservations: guests checked out, in the house, arriving, one cancelled and one no-show.
- Rooms board, the corporate client Tano Ridge Mining, and the night audit history.

3. Events & Conferences `0:30`

- Calendar and venue chart: the Iddrisu–Seidu Walima, the Tano Ridge quarterly review, the naming ceremony.

4. Restaurant, Bar & Kitchen `0:40`

- POS, orders in the kitchen, yesterday's till (₵5 short, noted on the handover), recipes.

5. Housekeeping & Maintenance `0:25`

- Today's room tasks by attendant, and the air conditioner that is not cooling.

6. Inventory & Stores `0:35`

- Low stock (cooking oil, Star crates), PO-0902 waiting for delivery, the stock count SC-0901 with its shortages.

7. Security `0:20`

- A patrol cut short, the kitchen fire alarm, and a contractor still on site past his time.

8. HR & Payroll `0:35`

- Staff, leave (a Tamale wedding approved, a maternity leave pending), last month's payroll and printing all payslips at once.

9. Accounting & Finance `0:40`

- Who owes us: Tano Ridge Mining across the age bands. Who we owe. The Income Statement and Balance Sheet.

10. Compliance & Reports `0:20`

- The Tax page: VAT, NHIL, GETFund, Tourism Levy and PAYE, ready for GRA.

Everything on screen is demo data: the people and companies are made up. Questions about the system go to Abdul on WhatsApp.
